DETAILED ACTION

1. This Office Action is in response to the Applicant's communication filed 01/14/2008 in response to PTO Office Action mailed 10/15/2007. The Applicant's remarks and amendments to the claims and/or the specification were considered with the results that follow.

Claim Amendments

2. Acknowledgment of receiving amendments to the claims, which were received by the Office on 01/14/2008. Claims 1-2, 7-8, 12, 14-15, 20, and 22 are amended and claims 13 and 19 are canceled.

The 35 U.S.C. § 112 rejections the Claims have been withdrawn due to amendment filed on 01/14/2008.

Response to Arguments

3. Applicant's arguments, see "Remarks", filed 01/14/2008, with respect to prior art have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John T. Kalnay (Reg. Num. 46,816) on July 16, 2008.

The application has been amended as follows:

Please replace all previous versions of the claims and replace with the attached Clean Copy of the claims.

Allowable Subject Matter

5. Claims 1, 3, 6, 8-11, 14, 17, 20, and 25 are allowed.
6. The following is an examiner's statement of reasons for allowance:
 - a. (Claims 1 and 25): Recite the limitation of using a proactive simulation in the operating system, where the operating system does not have true processor state available (i.e. ACPI table), to perform a forward-looking analysis of the

number of instructions per second to be required by the processor and using the results of the simulation to control the processor performance state by controlling the frequency and voltage of the processor without performing throttling and using a GPIO block or thermal management register to control a thermal management signal. These limitations in combination with all other claim limitations provide for allowable subject matter.

- b. (Claims 3, 6, 8, 9, and 10): Are allowable for being dependent on an allowable claim.
- c. Independent Claims 11 and 14, recite the limitation of using a proactive simulation in the operating system, where the operating system does not have true processor state available (i.e. ACPI table), to perform a forward-looking load determination of the processor and using the results of the simulation to control the processor performance state by controlling the frequency and voltage of the processor without performing throttling and using a GPIO block to control a thermal management signal. These limitations in combination with all other claim limitations provide for allowable subject matter.
- d. (Claims 17 and 20): Are allowable for being dependent on an allowable claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
